

## 2.3 HIT THAT TARGET!

**Objective:** Solve one-step problems.

**Instructions**

1. Your target number is 50.
2. Do 50 jumps, up and down, on the spot.
3. Try ten ways of adding two numbers to make the target number. For example, you might write down things like  $40 + 10 = 50$ , or  $49 + 1 = 50$ .
4. Have another go, choosing a new number under 50.

**Challenge**

Can you use subtraction to make your target number?
