

What to do...

1. Ask a friend or relative to fish out the coins in their pocket and lay them out on the table – tell them they will get their money back!
2. Write the numbers of each coin.
3. Can you work with a partner to find out how much all the coins add up to?
4. Show all your working.

Coin count-up!

This activity helps your child to recognise coins and to add amounts of money. Because the amounts may be quite large, you will need to help. Separate the pounds and the pennies. Add the large coins first, e.g. 50p + 20p + 20p, etc. then add the 5p and 1p coins at the end.

© Hamilton Trust, 2008. Y2.

$$10p + 10p + 10p + 10p = 40p$$

$$20p + 20p = 40p$$
